

Emergency Oxygen Inlet Station

3/4" | 1" | 1 1/4" | 1 1/2" | 2"

Features

- ✓ Lockable
- ✓ Weatherproof
- ✓ NEMA 4X
- ✓ Stainless steel enclosure
- ✓ Recessed or surface mount
- ✓ CRN Registered Valve Assembly

Specifications

Class 1 Inc. ELP Series stainless steel Emergency Low Pressure Oxygen Inlet.

Valve shall be quarter-turn on-off ball type, cleaned for oxygen service, factory pressure tested, in-line serviceable and rated for 600 PSI.

Valves assembly shall be complete with a 1/8" FNPT port downstream of the valve. Valve assembly shall be complete with bronze body, lever handle, chrome-plated bronze ball, Teflon seals and seats, and type K copper tubing extensions.

Gauge shall be 2-1/2" OD, brass housing, 0 to 100 PSI, and labelled and colour coded for Oxygen service. Gauge shall be labelled "Use No Oil".

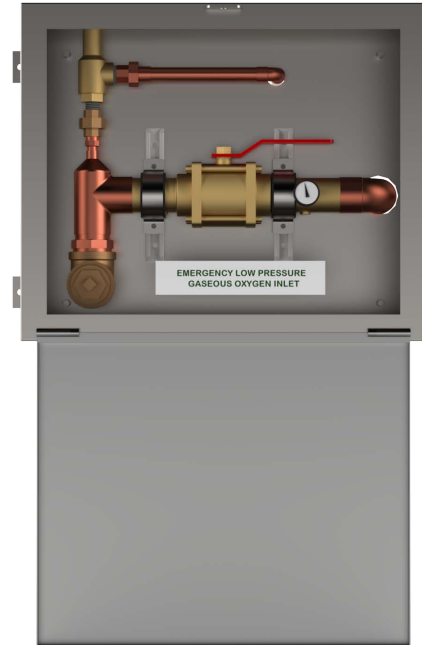

Image is of an ELP-200-PRV

Components shall be mounted in a recessed [surface mount] stainless steel NEMA 4X weather tight enclosure. Front panel to be complete with a full size access door with padlock hasp. .

Front panel to be labelled: **"EMERGENCY LOW PRESSURE GASEOUS OXYGEN INLET"**

Operating instructions shall be located inside the enclosure.

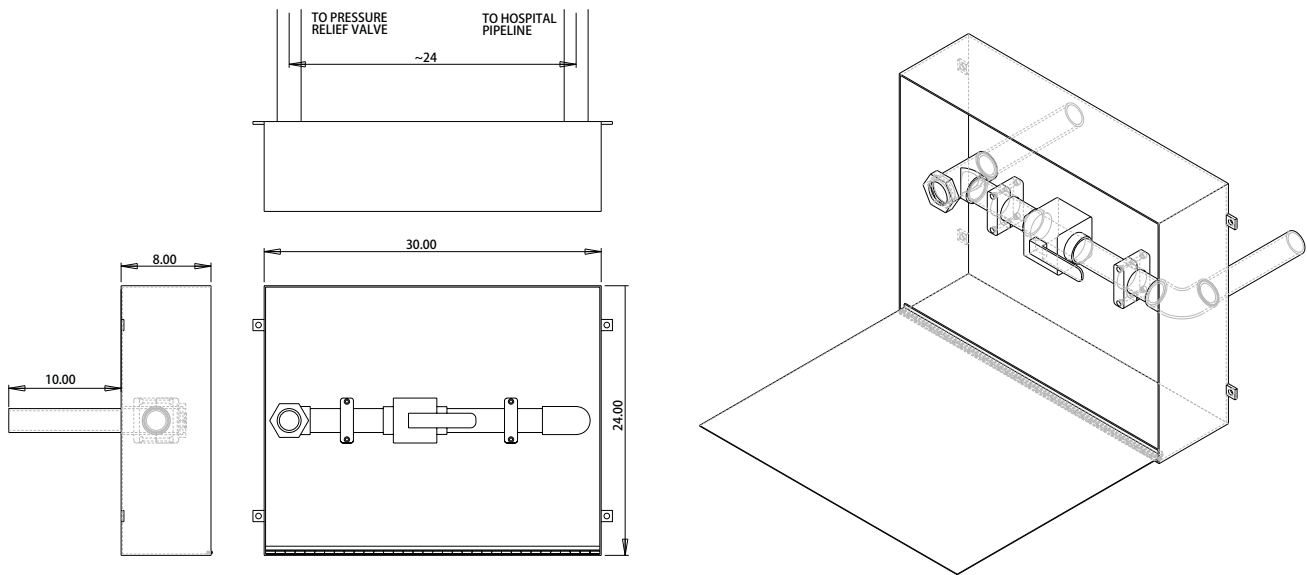

An ASME pressure relief valve, set at 75 PSI, shall be located downstream of the inlet assembly.

An in-line bronze check valve, complete with bubble-tight soft seat , shall be installed downstream of the inlet assembly.
